### INDEX

TO THE

## MATHEMATICAL GAZETTE

No. 327, FEBRUARY 1955-No. 330, DECEMBER 1955

- 1. Articles.
- 2. Mathematical Notes.
- 3. Pseudaria.
- 4. Reviews and Notices.
- 5. News of Branches.
- 6. Gleanings Far and Near.
- 7. Correspondence.
- 8. Miscellaneous.
- 9. Plates.

#### ARTICLES.

| AUTHOR.             | TITLE.   | PAGE. |
|---------------------|--|-------|
| F. M. Arscott.      | The oscillations of a heavy spring.                                | 126   |
| W. S. Brace.        | An English schoolmaster looks at American mathematics<br>teaching. | 89    |
| J. C. Cooke.        | The boundary layer and "seam" bowling.                             | 196   |
| W. L. Edge.         | 31-point geometry.   | 113   |
| W. Flemming.        | Thoughts on the training of the mathematics teacher.               | 20    |
| P. Gant.            | When is a parallelogram not a parallelogram?                       | 191   |
| R. J. Gillings.     | The oriental influence on Greek mathematics.                       | 187   |
| I. J. Good.         | On the marking of chess-players.                                   | 292   |
| J. B. S. Haldane.   | Targets.   | 1     |
| W. V. D. Hodge.     | Presidential Address, 1955. Changing views of geometry.            | 177   |
| H. Kestelman.       | Finite rotations of a rigid body.                                  | 278   |
| D. M. Lee.          | Diagnostic and remedial work in arithmetic.                        | 265   |
| J. Leech.           | Seven region maps on a torus.                                      | 102   |
| H. Lindgren.        | From necklaces to number theorems.                                 | 13    |
| E. H. Lockwood.     | Incyclic-circumcyclic quadrilaterals.                              | 98    |
| R. C. Lyness.       | Some considerations of gravity.                                    | 109   |
| W. H. McCrea.       | On Newtonian frames of reference.                                  | 287   |
| N. W. McLachlan.    | Two theorems on ordinary non-linear differential equations         | . 200 |
| T. Narayana Moorty. | Some summation formulae for binomial coefficients.                 | 122   |
| W. W. Rogosinski.   | Some elementary inequalities for polynomials.                      | 7     |
| A. W. Siddons.      | The product of two series.   | 4     |
| P. Stein            | A numerical solution of $\frac{d^2y}{dx} = F(x)$ .                 | 203   |

| 14                 | THE MAINEMATIONE OMETTE                             | 1    |    |
|--------------------|---|------|----|
| AUTHOR.            | TITLE.  | PAGE |    |
| D. G. Taylor.      | Triangles with common circumcentre and orthocentre. | 100  | C. |
| C. O. Tuckey.      | A misuse of symmetry.                               | 31   |    |
| G. N. Watson.      | Schur's inequality.                                 | 207  |    |
|                    | Two more Tripos questions.                          | 286  |    |
| Annual Meeting, 1  | 955.  | 184  |    |
| Report of the Cour | ncil for 1954.                                      | 185  |    |
| The Editorship of  | the Gazette.  | 265  | L  |
|                    |   |      |    |

#### MATHEMATICAL NOTES.

W R.

| AUTHOR.              | No.   | TITLE.  | PAGE  | C.       |
|----------------------|-------|---|-------|----------|
| H. ApSimon.          | 2480  | More modern conveniences.   | 46    | R.       |
| E. J. Armstrong.     | 2536  | A note on Latin squares.  | 215   | H.       |
| F. M. Arscott.       | 2548  | A test for divisibility by 19.  | 232   | J.       |
|                      | 2566  | Tests of divisibility.  | 305   |          |
| A. D. Booth.         | 2492  | On multidimensional Pythagorean numbers.  | 57    | K.       |
| A. D. and K. H. V. B | ooth. |   |       | D.       |
|                      | 2505  | On magic squares.   | 132   | W.       |
| G. Braithwaite.      | 2502  | On covering the surface of a sphere and the regular<br>polyhedra.   | 65    | L.       |
| A. Buckley.          | 2582  | Particular integrals of linear differential equations.  | 318   | T.       |
| L. N. Chown.         | 2578  | Circular orbits.  | 314   | I.       |
| G. A. Clarkson.      | 2522  | The ladder problem.   | 147   | D.       |
| P. H. Cody.          | 2568  | A note on infinite series.  | 306   | 3.       |
| S. N. Collings.      | 2486  | On a property of circles.   | 53    | K        |
|                      | 2555  | Polygons inscribed in polygons.   | 238   | D        |
| H. S. M. Coxeter.    | 2581  | The area of a hyperbolic sector.  | 318   | C.       |
| H. M. Cundy.         | 2539  | The dual polyhedral compound: Great Icosahedron + Great Stellated Dodecahedron. $\{3,5/2\} + \{5/2,3\}$ . |       | J.<br>H  |
| J. C. W. De la Bere. | 2572  | On a differential equation.   | 308   | D        |
| R. H. Dick.          | 2489  | Five-interval and seven-interval formulae for approximate integration.                                    | 55    | C.       |
| M. P. Drazin.        | 2573  | Some elementary identities.   | 308   | -        |
| C. Evans.            | 2557  | Notation for the logarithm of a negative number.  | 239   | R.       |
| R. A. Fairthorne.    | 2541  | On digital distribution.  | 225   | H.       |
| D. F. Ferguson.      | 2500  | On Note 2287: completely factorisable quadratics.   | 63    |          |
| C. F. Fisher.        | 2554  | The inflexions of a real non-singular cubic.  | 237   |          |
| T. J. Fletcher.      | 2518  | A note on a Simson line property.   | 143   | L.       |
| P. Gant.             | 2556  | A proof of the cosine rule.   | 239   | E.       |
| H. Gebert.           | 2549  | A graphical representation of quadratic equations.  | 232   | W        |
| H. J. Godwin.        | 2511  | On Note 1975: shortcutting in multiplication on a calculating machine.                                    | а 137 | J.<br>L. |
| P. Goodstein.        | 2478  | Congruent triangles.  | 41    | E.       |
| A. E. Green.         | 2550  | On Note 2355: a dielectric cylinder.  | 231   |          |
| H. G. Green.         | 2538  | Four-point systems of real conics.  | 218   |          |

|            | PAGE       | AUTHOR.            | No.  | TITLE.   | PAGE. |
